

Public Bodies - Climate Change Reporting

This form is your annual report, required under the Climate Change (Public Bodies' Reporting Requirements) Regulations 2022 (as amended by the Climate Change (Public Bodies' Reporting Requirements) Amendment Regulations 2023).

This report relates to compliance with the climate change duties set out in Section 21 of the Climate Change Act 2021.

The climate change duties are:

- (1) *A public body, in performing its duties, must act in the way that it considers best to contribute to –*
- (a) *the meeting of the net zero emissions target by*
 - (b) *the meeting of any interim target;*
 - (c) *supporting the just transition principles and the climate justice principle;*
 - (d) *sustainable development, including the achievement of the United Nations sustainable development goals; and*
 - (e) *protecting and enhancing biodiversity, ecosystems and ecosystem services.*

Please complete this form and submit it to: publicbodiesclimate@gov.im along with any supporting documents.

Public bodies' climate change reporting does **not** feed into the national GHG inventory.
 It is intended to provide an overview of climate action within the public sector and ensure that the climate change duties are understood and being implemented.
 The report therefore focusses on a small number of high-level indicators.
 It is not a full-scale, detailed emissions report, which would need to be undertaken by a suitably experienced emissions auditor.

Guidance is included throughout and FAQs are included on a separate tab.
 However, if you have any queries about how to complete this form please email: publicbodiesclimate@gov.im

TOTAL FOR REPORTING PERIOD

This section will show the public body's total emissions, for the reporting period, based on the data entered.

NOTE: This report is limited to a small number of high level indicators and therefore does not cover all GHGs or GHG emitting activities.

Total reported emissions:	77,942	kgCO ₂ e

Q-R5

LAND AND HABITATS

Both category A and B public bodies must complete this question.

Enter details of any parcels of land of over 1 hectare owned by the public body during the reporting period.

Parcel reference / address	Area (hectares)	Habitat type	Gas exchange (pa)	
			0	kgCO ₂ e
			0	kgCO ₂ e
			0	kgCO ₂ e
			0	kgCO ₂ e
			0	kgCO ₂ e
			0	kgCO ₂ e
		Total gas exchange:	0	kgCO ₂ e

IMPORTANT

Some habitat types are EMITTERS (ie. they release CO₂ into the atmosphere).

Habitat types that remove CO₂ will return a minus value in the blue column, habitats that release CO₂ will return a positive value.

PLEASE NOTE

This section is designed to give only a rough indication of the carbon removed by the land owned by the public body and, in future reports, to track land use change.

If you have more detailed information or would like to improve the level of detail relating to removals by land owned by the public body, please contact the Climate Change Transformation Team.

Please see 'Guidance Notes' for assumptions.

NET REPORTED EMISSIONS FOR REPORTING PERIOD

The public body's net emissions (ie. emissions minus carbon stored) for the reporting period are:	77,942	kgCO ₂ e
